

# CLEANING OUR RUGS DURING COVID-19

**Be Clean and Green!**  
**Easy to clean using only Hot Water Extraction!**  
**No chemicals needed.**

Hot Water Extraction - Truck mounted cleaning options are widely available in the US. With our products that have our Advanced Stain blocker Technology we recommend just the hot water extraction only (no harsh chemicals needed) at a temperature range of 140 - 150 degrees at the cleaning nozzle head. This temperature should be able to neutralize most bacteria & virus concerns. In addition, our carpets can be sprayed with an isopropyl alcohol spray (recommended at 70% IPA concentration with no added essential oils as this could cause the carpet to soil) as another method of sanitizing.

**When Quality Counts!**

## OUR CARPETS CAN BE DEEP CLEANED MULTIPLE TIMES

UP TO  
**25X**<sup>TM</sup>  
**STAIN PROTECTION**

### MORE ABOUT OUR ADVANCED STAIN BLOCKER TECHNOLOGY

**LIFETIME** protection! This **proprietary technology** locks the color in to provide a protective barrier against staining and soiling! Our products can be deep clean 20-25 times and still retain 70% - 100% of its cleaning protection!
